Website Kalkulator BMI

Preparations and Submission Details

- The deadline will be on Thursday in 2nd week at 23.59 (WIB)
- Link to submit the assignment <u>here</u> (will be opened on Wednesday week 2)

Introduction

In this ten-day short course, you'll learn all about becoming a software engineer, including the career path possibilities. We'll also give you the opportunity to practice the main responsibilities of a software engineer as well!

Before you start...

 Make sure you have downloaded Visual Studio Code, Git and have access to Google Chrome

Mini Project Instructions

As Software Engineer, you are asked to create a website of Kalkulator BMI with a Create a website using the mockup design below:

Kalkulator BMI Berat badan ideal adalah impian semua orang. Tidak hanya memiliki bentuk tubuh yang menunjang penampilan, berat badan ideal juga menandakan kondisi tubuh yang sehat. Bagaimana denganmu? Yuk, hitung sekarang di kalkulator BMI. Jenis Kelamin ● Pria ○ Wanita Berat Badan (kg) **8**0 Usia (tahun) **2**7 Tinggi badan (cm) **/** 180 Keunggulan fitur 1. Menghitung berat badan 2. Menentukan kategori berat badan ideal atau tidak 3. Mempersiapkan program penurunan berat badan Kalkulator ini hanya boleh digunakan oleh orang dewasa (wanita hamil atau menyusui tidak boleh mengandalkan pembacaan BMI ini) dan tidak ada tindakan yang harus diambil berdasarkan nilainya selain berkonsultasi dengan orang yang memenuhi syarat seperti dokter.

Kalkulator akan memberi Anda gambaran tentang perbandingan berat badan Anda dengan nilai

umum. Indeks Massa Tubuh (atau BMI) dihitung sebagai berat badan Anda (dalam kilogram) dibagi

dengan kuadrat tinggi badan Anda (dalam meter) atau BMI = Kg/M².

Rumus BMI
